FREE Lagoon Analysis

N-P-K and Sludge Depth Analysis • No Obligation

The first step in preparing for a lagoon pump out is to determine the N-P-K nutrient value of your manure slurry. We are offering a **FREE** N-P-K Certified Lab Analysis and Sludge Depth estimate so you can determine the current condition of your lagoon(s). Samples include: Sludge Analysis, Top Water Analysis, and estimated 1:1 Pumping Mix Analysis. (No cost to you • \$225 value per lagoon)

We would also like to give you a **FREE** estimate of the pumping costs based upon: (1) How far the fields are away from the lagoon, (2) how thick the slurry is estimated to be, and (3) at an average \$2.50 prices for off road diesel fuel. (*Costs will be adjusted to actual inputs at time of pumping*)

Lagoon Pumping & Dredging, Inc.
